

YST-2008 Crystal Liposuction Equipment

Crystal Liposuction is an advanced instrument of cosmetology and bodyfitting in the 21st century, because it fuses cosmetology with electric face-lifting, using the RF instrument to make the skin supple and exploding the fat to lose weight. Its componenets include: the RF pen to make the skin supple; the electric face-lifting head; the ice wave head and the radio frequency head.

Functions:

- removing the dark patches and the wrinkles around the eyes;
- eliminating the wrinkles on the face,
- promoting, whitening and making the skin tender, removing scars
- losing weight with high efficiency, removing the striae gravidarum and tightening the flesh.
- quick and long lasting effects
- simple operation
